EXTENDAFORK[®]

The Australian manufactured Sattach Extendafork[®] broadens the versatility of the forklift truck.

The Extendafork[®] can reduce warehouse aisle space by up to 50% by loading racking two-deep or double-deep. This enables four rows of racking to be brought together eliminating alternate aisles.

Compared to a pantograph an Extendafork[®] is lighter, has better operator visibility and is cheaper to buy and maintain. The Extendafork[®] also allows normal lift truck manoeuvrability when retracted.

Features:

- ✓ High tensile steel used to minimise weight
- ✓ Flow divider ensures synchronised operation of forks
- ✓ Low maintenance with no lubrication required in most situations
- ✓ Serviceable hydraulic cylinders with easy access

Options:

- ? No mini load backrest so as to handle two pallets at once or to safely handle very deep loads
- ? Class III mounting
- ? Hang on side shift
- ? Hose reels, solenoid valves and buttons for easy hydraulic installation
